

Anna Filatova

Software Developer

Sacramento, CA | (650) 575-4651 | filatovaa@yahoo.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

Forward-thinking full-stack developer specializing in front-end solutions that align business goals with user needs. Expert at transforming designs into seamless, pixel-perfect interfaces while staying ahead of emerging technologies. Collaborative and adaptable, I deliver digital experiences that exceed expectations and drive project success.

SKILLS

Front-End Development: JavaScript (ES6+), TypeScript, Next.js, React, Remix.js, Tailwind CSS, Chakra UI, SCSS, Bootstrap, Figma, Responsive & Accessible Design (WCAG), Lightweight Charts, HTML

Back-End & APIs: Node.js, Express.js, Firebase, Sanity, MongoDB, PostgreSQL, SQL, RESTful APIs, Sanity

Tools: Git, GitHub, Webpack, Babel, Jest, CI/CD Pipelines, Postman.

EXPERIENCE

Soulbound / Software Developer

Mar 2023 - Dec 2023, REMOTE

- Developed and maintained scalable front-end architecture using TypeScript, Remix.js, and Tailwind CSS, delivering robust proof-of-play systems tailored for gamers
- Collaborated with the back-end team on API design through pair programming, developing efficient services and endpoints using PostgreSQL, enhancing performance and ensuring seamless deployments
- Utilized Jest for automated unit testing with ~73% coverage, integrated into a streamlined CI/CD pipeline, ensuring reliability and reducing production defects
- Enhanced development workflows by proactively resolving 1-2 critical issues per sprint through GitHub, addressing technical debt and improving overall code maintainability and performance
- Communicated closely with designers to align deliverables with expectations, effectively prioritize tasks, and proactively identify out-of-scope items, ensuring efficient use of time and resources

Promotely / Software Developer

Jun 2021 - May 2023, REMOTE

- Conducted cross-platform compatibility testing to ensure a seamless, responsive web design and experience across devices and browsers
- Accelerated application performance by reducing loading time by 32% through benchmarking performance, implementing code splitting, lazy loading, and optimizing static assets with an efficient cache policy
- Utilized Lighthouse to diagnose and fix web accessibility issues, ensuring WCAG compliance for inclusive design and achieving a score above 98

Bazari / Frontend Developer

Apr 2022 - Dec 2022, REMOTE

- Built a dynamic game analytics platform using Next.js, TypeScript, and Chakra UI to provide an intuitive user interface and experience
- Implemented TradeView and Chart.js to visualize complex game data, improving data accessibility by 60-70%
- Optimized frontend architecture by transitioning from Bootstrap/SCSS to Chakra UI, eliminating 1,100+ lines of code and improving maintainability
- Participated in scrum and sprint meetings to define objectives, track progress, and refine features, consistently completing assigned tasks on or before deadlines—resulting in on-schedule product releases and improved sprint predictability

eStreet / Web Developer

Sep 2020 - Jun 2021, REMOTE

- Investigated and resolved WordPress theme inconsistencies, plugin conflicts, and front-end rendering issues, ensuring seamless performance and a smooth user experience.
- Created webhook listener using AWS Lambda functions and API Gateway to ensure 100% of DTC orders are Avalara API ship compliant

- Migrated legacy WordPress sites to Jekyll, reducing page load times by up to 80% and eliminating database dependencies for faster, more secure performance
- Collaborated with design and product teams to deliver pixel-perfect Jamstack apps, ensuring responsive design, accessibility (a11y), and performance optimization

PROJECTS

BriteKard / <https://britekard.netlify.app>

React.js | Tailwindcss | Node.js | MongoDB | Express.js | Cloudinary API

A digital business card app that allows users to create custom business cards and share them using a unique link or QR code.

Crypto-Xchange / <https://crypto-xchange.netlify.app>

Next.js | Chakra UI | Firebase | Typescript | CoinGecko API

A cryptocurrency marketplace app that provides historical price data where users can save, favorite, and imitate coin transactions.

EDUCATION

General Assembly / Software Engineering Immersive Certificate

Feb 2020, REMOTE

Penn State University / Bachelor's of Arts, Economics

Aug 2016, PA
